

## QL PROBLEMS - BEGIN COPY & PASTE

---

### Problem 1.

Show all the publishers and their cooking books that cost less than \$30. Use the **implicit join** technique to join the tables needed. Use table name aliases throughout the statement. When listing the publishers, specify the pub\_id and the name.

YOUR ANSWER HERE:

```
SELECT p.pub_id, b.title, p.name ,b.price, b.type
FROM book b ,publisher p
WHERE p.pub_id = b.pub_id
AND price < 30
AND type = 'cooking'
;
```

---

### Problem 2.

List all books and their price where the price of the book is less than the book with the highest price. Pick the correct ANY or ALL modifier to solve this problem.

YOUR ANSWER HERE:

```
SELECT title, price
FROM book
WHERE price < ANY
  (SELECT DISTINCT price
   FROM book);
```
