Problem 1.

Code a **SELECT statement** that shows book titles, the price, and the advance paid but only show books that have been given an advance of 10000 or more or whose price is greater than $30.

If the price is NULL show that as well. Sort in book title order

```
SELECT title, price, advance
FROM book
WHERE (advance > 10000 OR price > 30) OR price is NULL
ORDER by title;
```

Problem 2.

Code a **SELECT** statement that shows all authors that who live in Oakland, California.

Also show any author with the last name of Singer no matter where they live.

Sort the results in author order by lastname, then firstname.

```
SELECT lastname, firstname,  city, state
FROM author
WHERE (city = 'Oakland' AND state = 'CA') OR lastname = 'Singer'
ORDER by lastname ;
```

Problem 3.

Code a **SELECT statement** that shows all books that have yet to set a publication date.

Include the title and isbn number in the SELECT list as well as the publication date.

Sort in title order.

SELECT isbn, title, pubdate
FROM book
WHERE pubdate is NULL
ORDER by title;
